

HyperBot 5.0.0

What's new for the servers you run — starting with the free upgrades everyone gets, then an optional Pro upgrade if you want more room to grow. Every feature below is clearly marked **Free** or **Pro**.

July 17, 2026

dashboard to manage it

NEW THIS UPDATE — FREE FOR EVERYONE

No upgrade needed, available in every server

Embed Builder & Saved Embeds

FREE

Design rich, formatted embeds right from the dashboard — title, color, image, footer, all of it — post them straight to a channel, and save your favorites as reusable templates. No more hand-writing embed code or paying another bot for it.

AutoMod Action Log

FREE

Every delete, timeout, or warning AutoMod hands out in your server is now recorded in one place, so you can see exactly what your automated moderation has been doing — no digging through channel history.

Casino Seasons

FREE

The server economy & casino now run in seasons — a resettable leaderboard that turns your economy into a recurring competition your members can climb. Members check the standings with `/season`. Great for keeping engagement fresh month after month.

Real-Time AutoMod

Blocked-word filtering, duplicate-link spam cooldowns, and @everyone-abuse tracking — each toggle independently.

FREE

Support Tickets

A one-click ticket panel your members open, and mods claim and close — tracked automatically.

FREE

Server Economy, Casino & Sportsbook

Wallets, daily bonuses, table games, and a live sportsbook — all run on server currency, no real money.

FREE

Leveling & Ranks

Members earn XP for chatting and voice time; each server has its own leaderboard. Toggle it on or off yourself.

FREE

Reaction Roles & Server Setup Builder

Self-assign roles by reaction, and a guided builder to stand up your server's core channels.

FREE

YouTube & Twitch Live Notifications

Auto-post to a channel when you upload or go live.

FREE

Utilities

Countdowns, timezone conversion, unit/currency conversion, and console status checks.

FREE

None of the above requires Pro. Pro only adds higher limits and the extra tools on the next page.

Everything you've read so far is free. Pro is an optional upgrade for servers that want more — it now comes in three tiers instead of one flat plan, so a smaller community isn't paying for headroom it doesn't need, and a bigger one isn't capped too early. All three tiers unlock the same Pro tools; the difference is how much of each you get.

WHAT YOU GET	TIER 1	TIER 2	TIER 3
Custom welcome banners / month	15	50	125
Scheduled announcements	1	5	15
Named ticket panels	1	3	10
Join-to-create voice hubs	—	3	7
YouTube channels followed	5	10	25
Event log retention	7 days	30 days	90 days
Emergency lockdown & anti-spam	✓	✓	✓
CSV data export	✓	✓	✓

TIER 1 FITS YOU IF...

You run one support queue, post the occasional announcement, and mostly want the core Pro tools — custom banners, your own bot nickname, brand colors.

TIER 2 FITS YOU IF...

You're actively growing — multiple ticket categories, regular announcements, and you want voice hubs for members to hang out in on their own.

TIER 3 FITS YOU IF...

You're running a large, active community — heavy ticket volume, frequent announcements, long-term audit history, and lots of voice hubs at once.

Join-to-Crete Voice Hubs Members join a hub and get their own private voice room with owner controls (Tier 2+).	PRO
Growth Insights & Top Inviters Analytics on how your server is growing, and who's bringing people in.	PRO
Saved Ticket Transcripts Keep a full record of every support ticket after it closes.	PRO
Custom Welcome Banners Branded welcome images for new members instead of a plain text greeting.	PRO
Emergency Lockdown, Freeze & Anti-Spam Panic buttons to instantly calm a raid or spam wave.	PRO
Brand Colors, Currency & Bot Nickname Reskin the bot's name, embed colors, and your economy currency to match your server.	PRO
Multiple Ticket Panels & Scheduled Announcements Run several named support queues and schedule recurring posts.	PRO
Custom Shop Roles & Economy Role Tiers Sell your own roles in /shop and auto-grant roles as members climb the economy.	PRO
Advanced Event & Webhook Config + CSV Export Fine-tune per-event actions, route them to webhooks, and export tickets/logs as CSV.	PRO

✗ ~~/serverinfo~~

✗ ~~/memberid~~

✗ ~~/roleid~~

If your server leaned on these, it's worth a quick check that nothing (a pinned message, a rules channel, an onboarding guide) still points members to them.

HyperBot

Discord & Twitch, one bot
